MediBuddy crosses 20,000 plus locations

04 December 2020 | News

This has been possible by working with a single-minded focus to build an unbeatable digital healthcare ecosystem

MediBuddy, in its vision to making high-quality healthcare accessible to every individual across the length and breadth of the country, has crossed 20,000 locations where its services are available. This has been possible by working with a single-minded focus to build an unbeatable digital healthcare ecosystem and by enabling the best of healthcare to be accessible from one window.

With a team of experienced, specialist doctors & network hospitals available 24x7 for online consultation on its platform, MediBuddy has been able to provide top-quality healthcare even to the remotest parts of the country like Demwe & Lohitpur, Arunachal Pradesh. On its journey towards making high-quality healthcare more accessible across the nation, MediBuddy has ensured that individuals have access to medical supplies even in the remotest towns such as Roing. Labs for health check-ups that have been set up in secluded towns/villages such as Chuta Dirak Gaon, Assam is another manifestation of the reach and comprehensiveness of coverage of MediBuddy.

Satish Kannan, Co-Founder & CEO, MediBuddy-DocsApp said, "Health has and should always be a number one priority for any individual and we at MediBuddy have embarked on our mission and responsibilities to provide comprehensive healthcare to all Indians via technology."

The MediBuddy platform empowers individuals to get their healthcare queries solved instantly along with providing them with online doctor consultations, order medicines & lab tests just with a click on their phone or computer - any day, any time. MediBuddy offers a platform for individuals to connect with Specialist doctors across 18 departments via phone, video anytime, anywhere.

Very often especially in remote areas, the clinical service is a remote-attending model that is available from 7 pm to 7 am that includes hospital admissions and cross-cover. With the help of telemedicine, individuals can conveniently ensure that the patient receives the right & timely care, and gain peace of mind. In the past year, the digital healthcare platform has helped over 80 lakh individuals connect to specialist doctors at night-hours.
