

Register to attend India LIVE Launch of Milli-Q® EQ 7000

22 January 2021 | News

Milli-Q® is a leader in providing ultrapure and pure lab water solutions, designed for scientists working in day-to-day and critical applications.

The banner features the Merck logo on the left, followed by 'Media Partner BioSpectrum' and the 'Milli-Q Lab Water Solutions' logo. The central graphic shows a yellow and blue airplane ticket with a globe and a scientist in a lab coat. Text on the ticket includes 'Milli-Q EQ 7000 LIVE Launch' and '18 FEB 2021'. To the right, the text reads: 'your ticket to an authentic experience of ultrapure water is here!' Below this is a yellow button with 'Milli-Q® EQ 7000 LIVE Launch' and 'UltraPure Water Purification System'. At the bottom, the event details are listed: '18 Feb 2021' and '11:00 AM - 12:30 PM'.

One size never fits all, especially when it comes to lab equipment. That's why we've expanded our ultrapure water system portfolio to give you more great and innovative choices. The latest addition in the Milli-Q® Ultrapure Portfolio is EQ 7000, a Type-I Water Purification System. The system gives you an authentic experience of Ultrapure water, designed for the modern day scientists. Join the LIVE event as we unveil the product and share more insights to help you get consistent & pure water quality, improve your productivity with reliable technical expertise & support.
