

Arzoo introduces COVID-19 vaccine slot tracker

14 May 2021 | News

Any citizen from across India can check the availability and also get notified for next available vaccine slots

Bengaluru based retail tech startup Arzoo has announced the launch of a COVID-19 vaccine slot tracker on its B2B platform as well as its main website, arzoo.com. Any citizen from across India can check the availability and also get notified for next available vaccine slots.

Arzoo has dedicated their whole website for vaccine slot tracking. However, the slot finding feature on its B2B (app) platform is created exclusively for the partner retailers. Spread across more than 20 cities, Arzoo currently has a retail network of 10K partner retailers.

Khushnud Khan, Co-founder & CEO, Arzoo explains that one can check for the vaccine availability as per his/her pin-code or district and select between 18+ and 45+ age groups. The new feature also helps the users in finding nearby vaccination centres and can also send notification when the vaccine slots are available.

“We are dedicating our whole website to the cause of vaccination for next couple of months, there won't be any other business on the corporate site. This opens the window for every citizen of the country to use the platform to check vaccine slot availability,” added Khan.
