

Carestream Health India unveils two products at IRIA 2022

26 March 2022 | News

The products are DRX Compass and LUX 35C detector

Carestream Health India launched two new products at the Main Scientific Hall at the 74th National Annual Conference of the Indian Radiological and Imaging Association (IRIA) is being held in Bengaluru. The first product was the DRX Compass. DRX Compass is a personalised, Powerful Partner that provides the proper selection of features and options to accelerate the workflow to a new altitude of efficiency.

Carestream Health India also launched the LUX 35C detector. The LUX 35C, is a lightweight, glass-free wireless detector ergonomically designed with the comfort of both patients and radiographers in mind. The Lux 35 supports various image-processing options to assist radiologists like tube and line visualisation, pneumothorax visualisation, bone suppression, etc.
