

Narayana Nethralaya, Acer launch PC-based therapy to treat visual impairment in children

04 May 2022 | News

Acer provided PC and 100+ tablets under CSR initiative

Narayana Nethralaya in collaboration with Acer India launched the PC + tablet-based software, 'VisioNova' designed for children suffering from Cortical Visual Impairment (CVI). This initiative by Narayana Nethralaya and Acer India aims at breaking down barriers and providing patients with better access to treatment.

Acer VisioNova, a path-breaking innovation was conceptualized as a mobile alternative to on-site therapy for CVI children that will offer them the standard of care. Narayana Nethralaya as a part of its 'Buds to Blossoms' initiative provides dedicated therapy programs to help children develop and improve motor, cognitive and visual abilities that significantly improve their quality of life.

Acer provided PC and 100+ tablets under CSR. Acer has also further intent to supply around 2000 tablets for patients where patients can pay the hospital a small, refundable deposit and receive the tablet for use from the comforts of their home and continue treatments even with COVID disruptions. This tablet will allow remote therapy under the mentorship of Narayana Nethralaya' CVI experts, making this treatment accessible to the outreach.
