

Dr LH Hiranandani Hospital installs 384 Slice Cardiac CT scan machine

11 July 2022 | News

The machine by Siemens Heathineers will provide more clarity for cardiologists/cardiac surgeons on the further line of treatment for the patients

Mumbai-based Dr LH Hiranandani Hospital has recently installed the most sophisticated 384 Slice Cardiac CT scan machine. The advanced, AI-based CT scanner makes CT procedure and its diagnosis three times better in accuracy (as compared to the older 128 slices for cardiac) leading to more clarity for cardiologists/cardiac surgeons on the further line of treatment to the patients.

The new '384 Slice Cardiac CT scanner' stand out in advanced CT procedures, with high-quality diagnostic imaging results; improve the patient experience with a wide bore of CT scan machine, which reduces fear of any claustrophobia; enhances efficiency with AI-based patient positioning and remote scanning assistance for technologists; increase standardisation with GO technologies powered by artificial intelligence; Enhancing patient safety by ultra-low radiation dose and low breath and less contrast for patients; fully automatic cardiac assessment thereby enhancing diagnostic confidence.
