

Kedaara Capital invests \$50 M in Oasis Fertility

26 August 2022 | News

The investment aims to strengthen Oasis' organic expansion and accelerate inorganic partnerships across India

Oasis Fertility announced an investment from Kedaara Capital for a significant minority stake in the company. This is Kedaara's second investment in the single speciality healthcare segment. With this \$50 million transaction and a commitment to deploy further capital for strategic acquisitions, Kedaara aims to support and fuel Oasis' growth towards realising its vision of becoming the most respected and leading fertility chain in India and adjacent markets.

The investment aims to strengthen Oasis' organic expansion and accelerate inorganic partnerships across India and adjacent markets to further its mission of being a research-driven, clinical excellence-oriented fertility platform.

The transaction will also provide an exit to InvAscent, who invested in the company in 2016. O3 Capital acted as the exclusive financial advisor for the transaction and Samvad Partners was the legal counsel to Oasis Fertility. Quillon Partners acted as legal counsel to InvAscent and Veritas Legal acted as legal counsel to Kedaara Capital.
