

Eye-Q introduces state-of-the-art advanced customised LASIK technology in Rewari

26 June 2023 | News

Aiming to treat approximately 100 patients with advanced LASIK machine by the end of this calendar year

Eye-Q, a chain of 32 Super-Speciality Eye Hospitals having presence in Delhi-NCR, Haryana, Uttar Pradesh, Uttarakhand, and Gujarat, has announced the installation of the first-of-its-kind Advanced Customised LASIK machine at its Rewari eye-care facility.

This cutting-edge machine will revolutionise laser vision correction and bring advanced treatments closer to patients in the Rewari region, eliminating the need to travel to the Gurugram facility. Through its Rewari eye-care facility, Eye-Q envisions enhancing the quality of life for individuals, especially youth aged 18-35 years who can do away with spectacles forever by availing of world-class eye-care treatments.

The Advanced Customised LASIK machine sets a new standard in laser vision correction, catering to a wide range of visual conditions, including mild to severe nearsightedness with or without astigmatism, farsightedness with or without astigmatism, and mixed astigmatism.

Eye-Q's procedure performed using this machine is known for its high reliability, painless experience, exceptional safety, predictability, and remarkable precision. Eye-Q aims to treat approximately 100 patients with this advanced LASIK machine by the end of this calendar year.

The machine combines the advanced technologies of the WaveScan WaveFront System and the VISX STAR S4 IR Excimer Laser with Iris Registration (IR). Moreover, the machine has received FDA approval due to its impressive success rate in treating more than 94 percent of eligible patients for laser vision correction.
