

C-CAMP partners with VC fund to fund deep-science innovations in India

05 July 2023 | News

To facilitate seed-stage investment funding of \$200-600K and capacity building for startups

Bengaluru-based Centre for Cellular and Molecular Platforms (C-CAMP) has partnered with venture capital firm, Capital 2B to foster early-stage deep-science innovations from India.

This partnership will facilitate seed-stage investment funding of \$200-600K and capacity building for startups having innovative solutions across biotechnology, more specifically food tech, agriculture and sustainability.

Through this partnership, startups selected by C-CAMP and Capital 2B will receive investment opportunities along with mentorship, networking opportunities, capacity building for enablement of acceleration towards market deployment.

In the last decade, C-CAMP has funded, mentored, incubated & accelerated 360+ startups. Many of these innovations are already in the market benefiting the society and contributing to India's bio-economy.

Through this partnership with Capital 2B, C-CAMP will soon open applications for further funding for startups across India. Selected startups will benefit opportunities from the combined ecosystem of Capital 2B and C-CAMP's to deploy their technologies.
