

Apollo Diagnostics launches processing lab in Tirupati to enhance healthcare accessibility

18 July 2024 | News

The lab introduces over 3,000 tests and Xpert Health Checkup packages, catering to diverse medical needs

Apollo Diagnostics, a prominent unit of Apollo Health and Lifestyle Ltd., recently celebrated the grand opening of its cutting-edge processing lab, marking its 140th facility nationwide.

Situated in Tirupati's NGO Colony, the inauguration ceremony was graced by Aranii Srenevasulu, MLA of Tirupati Assembly Constituency.

The newly unveiled lab expands Apollo Diagnostics' footprint in Andhra Pradesh, complementing its existing network of 6 patient care centers in the region and 115 across the state.

With a robust monthly capacity exceeding 25,000 samples, the facility offers a comprehensive range of diagnostic services, leveraging advanced technology for both routine and specialized tests, including home sample collection.

Addressing the gathering, Aranii Srenevasulu underscored Apollo Diagnostics' commitment to bringing world-class healthcare standards to Tirupati, aligning with the vision of Dr Prathap Reddy, founder of Apollo Hospitals. The lab introduces over 3,000 tests and Xpert Health Checkup packages, catering to diverse medical needs.

Devendra Singh Rajput, COO of Apollo Diagnostics, highlighted the facility's state-of-the-art infrastructure spanning 1500 square feet, equipped with automated analysers for precise diagnostic outcomes in fields such as Hematology, Biochemistry, and Microbiology.
