

NPPA revises ceiling prices of eight scheduled drugs

15 October 2024 | News

Drugs used for treatment of Asthma, Glaucoma, Thalassemia, Tuberculosis, mental health disorders, etc.

The National Pharmaceutical Pricing Authority (NPPA) has been receiving applications from the manufacturers for upward revision of prices citing various reasons like increased cost of Active Pharmaceutical Ingredients; increase in the cost of production; change in exchange rate etc.; resulting in unviability in sustainable production and marketing of drugs. Companies have also applied for discontinuation of some of the formulations on account of their unviability.

After detailed deliberations in the full Authority meeting held on 8th October, 2024, invoking extraordinary powers under Para 19 of the DPCO, 2013, and in larger public interest, NPPA has approved increase in the ceiling prices of eleven (11) scheduled formulations of eight (8) drugs by 50% of their current ceiling prices.

Most of these drugs are low-cost and generally used as first line treatment crucial to the public health programmes of the country. These drugs are used for treatment of Asthma, Glaucoma, Thalassemia, Tuberculosis, mental health disorders, etc.

Formulations for which Ceiling prices have been revised include: Benzyl Penicillin 10 lakh IU injection; Atropine injection 0.6 mg/ml; Streptomycin powder for injection 750 mg and 1000 mg; Salbutamol tablet 2 mg and 4 mg and respirator solution 5 mg/ml; Pilocarpine 2% drops; Cefadroxil tablet 500 mg, Desferrioxamine 500 mg for injection; and Lithium tablets 300 mg.

Earlier such extraordinary powers have been invoked by NPPA in 2019 and in 2021 whereby price of 21 and 9 formulations respectively were increased by 50% so as to ensure continued availability of essential drugs for the public.
