

Mahajan Imaging & Labs and Fortis La Femme to redefine women and child healthcare & diagnosis in India

02 September 2025 | News

Strategic partnership combines advanced diagnostics and super-specialty clinical care

Mahajan Imaging & Labs, a pioneer in integrated diagnostics and advanced medical imaging, has entered a strategic alliance with Fortis La Femme, India's leading hospital dedicated to women's and children's health, to create a new benchmark in integrated diagnostics and healthcare for women and children.

Sharmila Tagore, Veteran Actress & Padma Bhushan Awardee, inaugurated the revamped Radiology Department by Mahajan Imaging & Labs at Fortis La Femme, New Delhi, establishing it as a Centre of Excellence in High-Resolution Fetal Imaging.

The department features vibrant, patient-friendly interiors and state-of-the-art technologies, reimagining clinical experience by prioritising comfort, dignity, and care while ensuring more precise maternal and pediatric diagnostics.

Mahajan Imaging & Labs extends its comprehensive diagnostic network—MRI, CT, PET-CT, Nuclear Medicine, Pathology, Genomics, and Full-Field Digital Mammography across Delhi-NCR, offering families seamless access to world-class diagnosis. Combined with Fortis La Femme's expertise in maternity, gynecology, fertility, pediatrics, neonatology, preventive health, and surgery, the alliance creates a 360° ecosystem for women's and children's health, focused on early detection, precise diagnosis, and personalised treatment.

Despite progress, women and children in Delhi-NCR continue to face pressing health issues:

- Cancer among women in the region is projected to rise 19.3% by 2026, increasing from 12,772 cases in 2021 to 15,244 cases, with breast and cervical cancers remaining the most prevalent.
- Gestational Diabetes Mellitus (GDM) affects an estimated 14% of women in Delhi.

These trends highlight the need for enhanced diagnostic access, preventive screenings, and personalised care, goals that this alliance aims to achieve.

This collaboration, marking the third alliance between Mahajan Imaging & Labs and the Fortis network, sets a new benchmark in integrated healthcare, ensuring that women and children receive holistic support that combines advanced diagnostics with specialized clinical care.
