

Lupin strengthens global specialty ophthalmology business with acquisition of VISUfarma from GHO Capital

04 October 2025 | News

VISUfarma's established European operations will provide market expansion opportunities

Mumbai-based pharma major Lupin Limited has announced that its wholly owned subsidiary, Nanomi B.V., has signed a definitive agreement for the acquisition of VISUfarma B.V., a portfolio company of global healthcare specialist investor GHO Capital Partners LLP.

The acquisition of VISUfarma, with its broad portfolio of innovative eye health products and established commercial infrastructure, aligns with Lupin's strategy to expand its European business and footprint and to advance the company's global specialty franchise.

By integrating VISUfarma's established commercial operations, Lupin will tap into the attractive ophthalmology market, which is experiencing significant global growth driven by an aging global population, the increasing incidence of diabetes-related eye complications, and growing awareness of preventive care.

VISUfarma's established European operations will provide market expansion opportunities, direct presence and further business diversification across major European countries, including Italy, the UK, Spain, Germany and France.

In addition, VISUfarma's broad portfolio of 60+ branded ophthalmology products will present growth opportunities to

accelerate Lupin's expansion into the specialty segment across regions, and is projected to drive growth in Europe as well as in other markets.

With the integration of VISUfarma, Lupin will offer a complete portfolio of products in the areas of dry eye, glaucoma, eyelid hygiene, blepharitis, retinal health and highly focused nutraceuticals prescribed by ophthalmologists.

Lupin will finance the acquisition with existing cash on balance sheet. The acquisition is expected to be accretive to Lupin's growth and margin profile. The transaction is projected to close by the end of 2025, subject to certain closing conditions.
