

## New England Biolabs opens subsidiary in Bengaluru

06 March 2026 | News

**NEB has supported researchers in India for many years through its distribution network.**

US-based New England Biolabs (NEB), a world leader in the production of reagents for the life science industry, is extending its global subsidiary network with the opening of New England Biolabs India Pvt Ltd (NEB India) at Phoenix Asia Towers in Bengaluru, Karnataka.

India has long been a global leader in the life science space as a result of both strong public sector support and private sector investments. NEB has supported researchers in India for many years through its distribution network. NEB India will now bring a higher level of service to valued customers and local distributors in this important market.

“This new subsidiary office will provide the scientific research community in India with more efficient access to the latest NEB products and technical support in the local time zone, a state-of-the-art Experience Center and footprint for local manufacturing activities, as well as custom partnership opportunities,” says Partha Chakraborty, Country Manager for NEB India.

Carole Keating, Executive Director of International Business at NEB said, “This expansion of our subsidiary network in India enables NEB to offer even greater personalized service to our customers, rapid delivery, and the ability to explore higher levels of collaboration.”

NEB also maintains subsidiary offices in Australia, Canada, China, France, Germany, Japan, New Zealand, Singapore, South

Korea and the United Kingdom.
