

Pacific OneHealth commits Rs 300 Cr to build largest micro-hospital chain in North India

23 March 2026 | News

Phased rollout begins with Rs 100 crore investment to establish 5 micro-hospitals in Delhi NCR over 2 years

Pacific OneHealth, a healthcare venture backed by the Pacific Malls Group, has announced a committed investment of Rs 300 crore to build the largest integrated community micro-hospital chain in North India.

Pacific OneHealth's phased rollout begins with Rs 100 crore investment to establish five micro-hospitals in Delhi NCR over two years, serving as proof-of-concept and referral hub for North and Central India. From year 3, expansion targets 10+ facilities nationwide, scaling to 20 over a decade, digitally integrated with EHR, telemedicine, and seamless care coordination.

The initial deployment of Rs 100 crore will fund five units in Delhi NCR within the first two years, scaling to 10 or more micro-hospitals in five years and a long-term vision of 20 or more facilities during the ongoing decade, with a target of touching half a million lives by 2030.

Pacific OneHealth's model extends beyond hospitals with a six-programme ecosystem: SeniorCare Plus, POH Home Healthcare, neighbourhood and corporate clinics, corporate wellness, school health, and MyOneHealth digital platform. Together, these initiatives position Pacific OneHealth as a lifelong health partner.

Pacific OneHealth's micro-hospital model bridges the gap between under-equipped clinics and overcrowded large hospitals. Each 30–80 bed facility delivers 70% of surgeries as day-care or short-stay, covering specialties like gastroenterology,

gynaecology, urology, ENT, and orthopaedics. Units also provide 24x7 emergency care, specialist OPDs, and advanced diagnostics, fostering continuous community engagement.
