

## VFL Sciences announces launch of GreatOrbit range of incubator shakers

09 April 2026 | News

### S series with full stainless-steel body is specially designed for GMP/ GLP labs

Chennai-based VFL Sciences has announced the launch of GreatOrbit series of Compact, stackable Incubator shakers. GreatOrbit is available in M and S series with a platform size of 46 X 46 cm and very flexible clamp configuration. The S series with full Stainless-steel body is specially designed for GMP/ GLP labs.

All models come with a 7" colour display, multiple step programming, Temperature range up to 80 deg centigrade, speed up to 400 rpm, complete data logging system with user level access. The system can accommodate flask up to 5 litres. Our GreatOrbit shakers are "Better Alternative" to the available models and are built with the best technologies currently available in the market.

Vancheeswaran Sankaranarayanan, Managing Director of VFL Sciences states "With the Biomanufacturing expected to grow due to the BioE3 initiative from the Government, the GreatOrbit products will help the institutions and companies focusing on this area. Our products are built to global standards from India and the technology will be more affordable."
